

**Compact pressure reducers**

**Description**

Device reducing the pressure of water passing through it, used to provide a constant preset value at its outlet. The pressure reducing valve is a completely independent device.

These 'compact models' are designed to protect small installations.

**Versions**

Connection	Female/Female Male/Male Swivel nut: 5437
------------	--

**Advantages**

- With pressure gauge tapping
- Can be preset to 3 bar

## Materials

Body: Brass

## Specifications

Max. upstream pressure: 10 bar  
 Max temperature: 90°C  
 Min setting: 1,5 bar  
 Max setting: 6 bar  
 Factory pre-set: 3 bar

## Product range

	Model	Type	Dimension	Code
	Adjustable pressure reducer with 1/4" pressure gauge tapping 5435	FF	1/2"	543504
			3/4"	543506
	Adjustable pressure reducer with 1/4" pressure gauge tapping 5437	Swivel nut	3/4"	543706

## Accessories

	Model	Dimension	Code
	Pressure gauge 5475 (radial connection)	1/4	P164000
